U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03) Continuation of 2. NOTE: The language added to claim 1 potentially necessitates a new ground of rejection under 35 U.S.C. 112. New grounds of rejection are not permitted in appeals. The language added raises the potential finding of indefiniteness. By referring to an element that is variable, indefiniteness is introduced. "A claim may be rendered indefinite by reference to an object that is variable. For example, the Board has held that a limitation in a claim to a bicycle that recited "said front"

and rear wheels so spaced as to give a wheelbase that is between 58 percent and 75 percent of the height of the rider that the bicycle was designed for" was indefinite because the relationship of parts was not based on any known standard for sizing a bicycle to a rider, but on a rider of unspecified build. Ex parte Brummer, 12 USPQ2d 1653 (Bd. Pat. App. & Inter. 1989)." MPEP 2173.05(b). In the use of a coolant tube, the presence or absence of laminar flow depends in large part upon parameters such as flow speed and fluid density. The claim fails to specify values for either, and thus essentially the "resuming laminar flow" recitation is indefinite because it depends on factors that are widely variable, i.e. flow speed and fluid density.
